

Oracle Business Intelligence 11g is the next evolution for Oracle Analytics. This solution is an aggressive service for upgrade success.

### What is Oracle BI 11g Upgrade Service

Oracle BI 11g supersedes its legacy version, Oracle BI 10g. The new Oracle Analytics solution is profoundly different and provides many new features that take Oracle’s Business Intelligence solution beyond that of any competitor’s. Legacy Oracle BI 10g is no longer supported by Oracle and now is the perfect time to upgrade. Sierra-Cedar has upgraded many Oracle BI clients from Oracle BI 10g to 11g and has found that through an aggressive timeline, organized implementation schedule, a focus on remediation, and use of best practices, the upgrade process can be met with 100% success. This service increases time to value and accelerates an otherwise lengthy process when conducted by internal departments.

### What is Delivered in Oracle BI 11g Upgrade Service

Sierra-Cedar’s upgrade service provides an end-to-end upgrade of the existing system with the minimum goal of replicating the existing environment to the latest Oracle BI version. This includes installation and configuration all the way through to remediating and testing reports and managing the User Acceptance Testing (UAT) process with your users before migrating the approved and validated solution to production.

### Upgrade Benefits

- Budget precisely for your Oracle BI 10g to 11g upgrade.
- Aggressive timeframe motivates and accelerates internal collaboration for success.
- Leverage Sierra-Cedar’s experience to expedite movement to Oracle BI 11g.
- Bring your Oracle Analytics implementation and support current
- Reduce implementation time and capitalize on time to value

### Challenges Overcome

- Configuring the Oracle BI 11g Infrastructure
- Migrating the Web Catalog, Oracle BI 10g Repository, and ancillary components
- Managing upgrade through current “In-Flight” project development
- Implementing OBIEE Multi-Developer infrastructure and strategy
- Applying best practices for Oracle BI 11g not existing in Oracle BI 10g
- Moving security into Fusion Middleware OPSS
- Managing User Acceptance Testing
- Understanding the Oracle Analytics Roadmap
