

Oracle's Business Intelligence Enterprise Edition (OBIEE) helps to enable your organization to turn vast separate data sources of information into actionable data and easily consumable information that is deliverable across an entire organization. Build clear visibility into your organization while accessing information in real time with less IT involvement with Oracle Business Intelligence Enterprise Edition that includes the industry's first unified environment for accessing and analyzing data across relational, OLAP, and XML data sources.

At Sierra-Cedar, our business intelligence services are unsurpassed, offering the most comprehensive understanding of your business and industries. We empower your employees to easily access the information they need to answer questions in a timely manner to improve decision making capabilities, whether they work in finance, supply, sales, human resources, or any other department.

If your company is dealing with multiple large volumes of data sets and many users while lacking real information and would like to consolidate multiple reporting and query tools into a single interface, Sierra-Cedar's inhouse consultants have the knowledge and expertise to help maintain your competitive edge.

**Sierra-Cedar Oracle Business Intelligence Enterprise Edition Services include:**

- **Oracle BI Server** – centralized, scalable, business model analytics server
- **Oracle Interactive Dashboard** – live, real-time graphical data across enterprise data sources
