

Sierra-Cedar's Service-Oriented Architecture (SOA) Suite and Business Process Management (BPM) service offering provides clients with a way of integrating their disparate software systems and applications so they communicate seamlessly. Companies implementing SOA Suite and BPM Suite are quickly realizing the benefits:

- Reduce time for new functionality
- Reduce integration cost and complexity
- Manage business and technology change
- Streamline business process exception handling
- Provide end-to-end solution monitoring
- Ensure high availability and scalability of the architecture
- Allow organization to model their business processes
- Allow for complex Human Workflow between disparate systems

Sierra-Cedar has extensive experience architecting, implementing and extending SOA Suite and BPM solutions for its clients that include Integration, Business Process Automation, and Composite Applications. Sierra-Cedar's SOA Suite and BPM services include the following:

- **“Getting Started Workshop”:** Sierra-Cedar has developed a complimentary, half-day “Getting Started with SOA & BPM” workshop. Material covered is geared toward CIOs, business leaders, process and data owners, and IT staff interested in understand how SOA can benefit their organization.
- **Architecture, Development, and Governance:** Sierra-Cedar offers deep Architecture and Development expertise that can be leveraged to assist in any phase of SOA Suite implementations. Sierra-Cedar also works with clients to develop a practical and comprehensive SOA Suite and BPM governance strategy. The strategy includes governance for service planning, development, operations, and reuse.
- **Composite Application Development:** Sierra-Cedar has worked with many clients on defining and implementing Composite Applications using Oracle SOA Suite. Composite applications leverage the Oracle SOA Suite and deliver applications that can access numerous services provided through various back-end systems. The result is a powerful business application that ties together friendly User Interfaces, services from back-end systems and business process automation that far exceeds traditional ERP development capabilities.
- **Installation Services:** Sierra-Cedar works with clients to architect and install the components of Oracle SOA Suite & BPM including BPEL Process Manager, Business Activity Monitoring, Business Rules, Service Bus, Complex Event Processing, WebCenter, and Universal Content Management.
- **Hosting:** Sierra-Cedar hosts Oracle Enterprise Applications, Fusion Middleware, and SOA Suite product families and Oracle Technologies as well as complementing third party system solutions. The Sierra-Cedar hosting solutions are secure, redundant, and highly scalable.
- **Training:** Sierra-Cedar's training is based on real-world implementation experience and covers basic through advanced courses that are tailored to your organization. All of the components within the Oracle SOA Suite are covered.

The consultants at Sierra-Cedar have a proven track record in successful implementations using SOA technology. Their insights and professionalism were critical to the success at ASU with our SOA implementation. In particular, the Getting Started workshop provided great value for both technical architects and IT management to learn what value SOA could bring to our institution and help us get started.
