

# Cloud Optimization Services Reach New Heights with Oracle Cloud Applications

Sierra-Cedar offers a robust and tailored Optimization Program designed to help you realize value from your SaaS applications, including team readiness assessments, configuration enhancement opportunities, and user count management. Our experienced team provides your organization with reports & dashboards, on-going education for your user community with precision learning plans, and the support you need to adopt new features as they become available in Oracle quarterly updates. Our program helps your organization optimize costs, mitigate risk, and position teams and systems for success.

## Onboarding & Assessment

- Review services, processes, and workflows
- Determine level of support
- Comprehensive assessments

## Project Work

- Develop reports or interfaces
- Implement new modules
- System configuration changes

## Optimization Planning

- Conduct structured review sessions to assess overall progress
- Evaluate effectiveness of previous improvements
- Identify new opportunities to take advantage of your Cloud investment

## Functional & Technical Application Support

- Break/Fix and workaround support
- Implement new functions and features
- Tailored end user education and training
- First Year First

## Key Challenges Addressed

**Complex Processes:** Streamlining and simplifying workflows that are currently cumbersome and inefficient.

**User Experience:** Enhancing the end-user experience to boost adoption and satisfaction across your organization.

**Mobility & Social Integration:** Adding mobile and social functionalities that meet modern business demands.

**Reporting & Data Quality:** Improving reporting capabilities and addressing data quality issues to support decision-making.

**Leveraging New Features:** Helping you take full advantage of new features & functionalities included in your subscription.

**Knowledge and Implementation:** Providing insights into the setup and implementation to help make better decisions.

## Summary

There are significant considerations when planning for a new implementation. Working with Sierra-Cedar, an experienced PeopleSoft and Cloud implementations partner, will provide you with access to the technical, functional, and logistical skills required to meet these challenges. We invite you to learn more about how our people, tools, and experience can help you get the most from your cloud investment.
