

Having System Integration Issues? Want to Support Cloud or Mobile Integration? Need an Integration Strategy and Roadmap? We Can Help.

If you have more than one application running in your environment or in the Cloud, there is a good chance you will need those applications to interact or share data. Business processes often span multiple systems and data sources, and allowing those processes to interact with systems in a standards-based way with centralized monitoring will greatly improve your ability to meet business needs. But where do you start? What software do you need now versus a year from now? What is Service-Oriented Architecture, and is it right for you?

Sierra-Cedar can help answer these questions as they relate to your specific business and technology goals. The workshop includes interactive sessions in which Sierra-Cedar will guide your team through exercises to identify short-, medium-, and long-term goals that can be achieved with proper integration strategies. A final deliverable will be prepared to describe how these concepts impact your upcoming projects, explain what your team needs to make it happen, and lay out a roadmap to help you with planning and strategy.

Timeline/Scope

The on-site portion of the workshop is delivered in three consecutive days. The final presentation date will be scheduled and can be done via Web conference or on site based on Client preference.

Workshop Agenda				
Day 1 (on site)	Day 2 (on sit:e)	Day 3 (on site)	Remote Work	Deliverable
<ul style="list-style-type: none"> • Introductions • Overview of integration concepts • Service-Oriented Architecture • Current client environment • Deep-dive of client-specific applications and business processes 	<ul style="list-style-type: none"> • Finish deep-dive into systems and processes • Review current and future projects • Identify future endeavors or goals • Discussion of dependencies and constraints (budget, resources, hardware, other projects, etc.) 	<ul style="list-style-type: none"> • Introduction to integration products • Align technologies with your projects and environments • Prioritize and rationalize short-, medium-, and long-term goals • Assess the skills of your IT team and identify any gaps 	<ul style="list-style-type: none"> • No formal sessions • Sierra-Cedar consolidates the information gathered and prepares the strategy and roadmap deliverable • Follow-up conversations as needed if there are questions from Sierra-Cedar 	<ul style="list-style-type: none"> • Sierra-Cedar completes the deliverable • Sierra-Cedar walks Client team through the deliverable content (optionally on site)

Why Sierra-Cedar

Sierra-Cedar has been recognized as an industry leader in enterprise integration with proven capability to plan, architect, and implement robust solutions. Because the intent is to provide an achievable strategy and roadmap, Sierra-Cedar engages active delivery architects with hands-on experience delivering these solutions to participate in the recommendations and creation of deliverables.
