

Healthcare organizations, overwhelmed by productivity-lowering information chaos, are challenged with providing better patient care at a lower cost by improving operations through quality and savings measures. With the ever-evolving interoperability technologies designed to help rationalize and organize information, hospitals need effective ways to connect employees, professionals, physicians, patients, and suppliers. Sierra-Cedar leverages best practices for design and implementation of solutions to integrate to other mission-critical systems and meet the business need to keep pace with upcoming organizational and business challenges.

Sierra-Cedar provides guidance in developing and navigating the next phase of our client's Oracle enterprise application strategy. With the fast-evolving market and regulatory conditions in healthcare today, business owners are demanding a single source of truth with unquestionable data accuracy. Sierra-Cedar's objective is to help our clients improve their financial, operational, and clinical performance. Key to this approach is focus on both quality and operational performance indicators and measurable outcomes that add value and empower our clients with a competitive advantage through more efficient operations and improved clinical decision-making capabilities.

Experience

Sierra-Cedar has served as a trusted Healthcare partner for over 30 years and employs 800+ professionals of which 105 average 13 years of healthcare industry expertise deploying Oracle applications and technology to over 80 healthcare clients. The latest releases of Oracle Applications (PeopleSoft Enterprise 9.2 and Hyperion), combined with the power of Oracle Technology (Fusion Middleware and OBIEE Solutions), provide healthcare organizations with strategic value propositions across mission-critical operational systems from Human Capital Management (HCM) and Talent Management solutions to Financial Management, Supply Chain (SCM), and Business Intelligence (BI)/Analytic solutions.

- **ERP.** Sierra-Cedar provides full lifecycle consulting, Hosting, and managed services capabilities across the PeopleSoft product line. Our integrated, process-centric approach results in best practices that improve services and increase efficiency and can include assessments, implementations, and upgrades. The managed services offerings include hosting and application management that provide customers with an alternative deployment and support approach.
- **Middleware, SOA, and BI/EPM.** Sierra-Cedar provides consulting and managed services for Oracle middleware including BI, Hyperion, Data Warehousing, Integration, Business Process Management, and Content Management. Sierra-Cedar's experience includes enterprise-wide rollouts of middleware/BI capabilities in addition to those provided in support of a particular line of business or subsystem.

We are differentiated by our highly skilled consultants, our innovative solutions, and our comprehensive set of consulting and managed services designed to be tailored to fit the scope of your project and achieve success.
