

The core focus of Sierra-Cedar's Integration & Cloud Solutions (ICS) practice is to build long-term customer relationships and deliver innovative and robust solutions with clear business value. While our implementation team is one of the strongest in the market, we recommend that our clients first leverage our expertise in planning and strategy to align current needs with an overall plan that will help achieve short-, medium-, and long-term success. Technology is constantly evolving, and Sierra-Cedar wants to partner with your organization to help get the most value possible from your Enterprise Integration and Cloud strategies.

Sierra-Cedar's ICS group has been recognized by vendors for exceptional ability to drive business value through innovative solutions. We are certified partners with Oracle and MuleSoft for integration and Salesforce.com for Salesforce implementations and custom Cloud solutions using the Salesforce1 Platform. Our most prized recognition, however, comes from our customers as references and repeat business.

Sierra-Cedar's ICS practice has over 20 years of success implementing packaged applications such as Oracle E-Business Suite, PeopleSoft, and Workday. Our application and business process professionals have the unique advantage of experience in aligning best-of-breed applications with best-of-breed integration and complementary Cloud solutions using the Salesforce1 Platform. A list of our various service offerings is below.

<b>Integration &amp; Service-Oriented Architecture</b>	Sierra-Cedar can help your organization improve agility and stability, reduce time to market on IT projects, standardize integration and process automation, enhance visibility, and establish a foundation for Mobile, Social, and Cloud-based endeavors by planning, designing, and implementing a Service-Oriented Architecture. Whether you currently have no integration in place and need a strategy and roadmap, have a solution but need a health check to address concerns, or want to expand your integration strategy into the Cloud, Sierra-Cedar can help. All solutions start with core enterprise integration best practices, and Sierra-Cedar specializes in Oracle, MuleSoft, and Boomi integration solutions for implementation of the solutions.
<b>Salesforce.com and Salesforce1 Platform</b>	Sierra-Cedar offers advanced consulting services for Salesforce.com and utilizing the Salesforce1 Platform to implement Cloud-based solutions for our customers. We offer unique and targeted solutions that have proven to be very beneficial in the Higher Education markets where Salesforce.com can help effectively engage prospects, recruits, students, alumni, and donors to boost retention, promote giving, and improve collaboration. In addition, the Salesforce1 Platform is a powerful tool Sierra-Cedar uses to implement custom Web applications
<b>Mobile and Web Application Development</b>	Sierra-Cedar delivers robust Web, mobile, front-end, and back-end custom development services utilizing open and core Java frameworks as well as Cloud-based development environments such as the Salesforce1 Platform and Oracle Public Cloud. This range of custom development capabilities and expertise allows Sierra-Cedar to help organizations select the right delivery approach for custom development efforts while maximizing business value.
<b>Infrastructure Planning and Maintenance</b>	Infrastructure Specialists ensure a solid foundation for reliability, performance, scalability, high availability, and manageability of all Sierra-Cedar solution implementations. These experts draw from years of experience managing small, medium, and large-scale business applications including assistance with software installation and configuration, operational best practices and support, and strategic infrastructure planning including high availability and disaster recovery. Specific expertise is available in Oracle Fusion Middleware and Enterprise Manager as well as MuleSoft on premise and hybrid architecture planning.
