Pre-built and Pre-Integrated Applications

Today's top companies are relying on Oracle Business Intelligence Applications to maintain their competitive edge by making critical strategic business decisions with access to relevant, time sensitive business data. If you spend too much time collecting and analyzing your business data, and checking that it's accurate, then you need to learn more about Oracle's Business Intelligence tools and how Sierra-Cedar can provide the insight and expert knowledge you need to stay competitive.

Oracle BI Applications are complete, pre-built BI analytic solutions that help people at all levels of an organization better understand how their business is performing. Because these applications are pre-built and preintegrated with the leading transactional applications, they quickly enable better decisions, confident action, and more efficient business processes, often in just weeks. Oracle BI Applications provide a single, integrated view of enterprise information, enabling greater insight and alignment across business functions.

At Sierra-Cedar we can help evaluate your current environment or help you implement a solution to fit your needs with Oracle BI Applications that are complete, pre-built, and provide best practice-based BI solutions:

- Pre-built integration of data from Oracle EBS, PeopleSoft, Siebel, JD Edwards, SAP and other source systems into an integrated data warehouse, optimized for analysis

- Pre-built ETL to extract data from transaction system operational tables and allow for federated query across multiple systems

- Embedded best practice calculations, metrics, and KPIs

- Pre-built warehouse with 100+ optimized star-schemas designed for analysis and reporting across all your enterprise data

- Easy for business people to access, analyze, and use the information

- Personalized Performance Dashboards for everyone, thousands of prebuilt dashboards, reports, and alerts categorized by business function and role

- Do more with less – deploy BI more broadly with fewer IT resources than custom-built solutions

- Accelerate time-to-value, lower TCO and risk
