

Oracle Business Intelligence 11g has evolved analytics. Our workshops will show and answer the question, “How?”

What is an Oracle Business Intelligence Workshop

Sierra-Cedar understands the importance of engaging users about the software they will use within the Enterprise. As such, Sierra-Cedar provides a half-day hands-on instructor led session which allows users to immerse themselves in the Oracle BI application suite. Workshops are led by our technical and functional experts having years of real-world experience in the Oracle BI and Oracle BI Applications space. Attendees are led through a custom workshop based on the Sierra-Cedar University training courses. Several targeted workshops variations are also available which focus on specific areas of business such as Oracle BI Applications (HR and Financial Analytics) and Hyperion/Essbase to Oracle BI integration.

Why Should My Organization Attend

Sierra-Cedar workshops provide key users within your organization an opportunity to interface with experts in Oracle Business Intelligence. Attendees are able to get hands-on instruction at no cost and interact with other local customers who are also engaged with Business Intelligence initiatives within their organizations. The high caliber discussions around Oracle BI's functionality, integration with related software, road map, and best practices makes this an event your team will not want to miss.

Attendee Benefits

- Get hands-on with instructor led workshop materials using our training environment
- Get real-world use experiences and talk with other organizations implementing Oracle BI 11g
- Ask your questions to one of our OBIEE experts
- Get Oracle Analytics Roadmap highlights and tactical information to help plan your BI strategy
- Understand how the Oracle Analytics toolset ties in through the common enterprise information model
- This is a no-cost event

What to Expect

- Breakfast/lunch
- A quick means to test drive the product
- High caliber discussions around Oracle BI
- Instructor-led hands on workshop with Oracle BI
- An Oracle BI professional who can answer questions related to the product
- A “no sales pitch” experience
