Hyperion Performance Scorecard is at end of life support. Your path: Oracle Scorecard and Strategy Management.

Upgrade Benefits

- Leverage our functional experience with Enterprise Scorecarding initiatives
- Transition painlessly from legacy Hyperion Scorecard to OSSM in a manageable timeframe
- Leverage new capabilities of the Oracle BI 11g platform and BIFS
- Gain new visualizations and Scorecarding perspectives
- Reduce complexity of use and maintenance efforts
- Realign with Oracle support and the BI/EPM through BIFS integration

What to Expect

- Functional expertise for understanding your scorecard initiatives
- A best practices implementation and transition from your existing Scorecarding application
- A fully managed end-to-end upgrade implementation
- Incorporation of BIFS functionality where possible to add value
- A best-in-class product with best-in-class consulting services with an on-time on-budget implementation

What is the Oracle Scorecard Upgrade Service

The successor to Hyperion Performance Scorecard (HPS) is Oracle Scorecard and Strategy Management (OSSM) which is part of the Oracle BI Foundation Suite (BIFS). Sierra-Cedar has taken its Enterprise Performance Management (EPM) expertise and combined it with our experiences implementing Oracle BIFS in order to create an aggressive process that takes clients from Hyperion Scorecard to its successor application, OSSM, in a quick manageable timeframe. This upgrade service accesses your existing Scorecard application, its initiatives, objectives, etc. and our consultants work with your Subject Matter Experts to develop the solution in OSSM. This service manages all areas of development and testing and coordinates the deployment into production.

Why Should My Organization Upgrade to OSSM

OSSM provides more robust features than the legacy Hyperion Performance Scorecard application with more features for multiple user interaction, report distribution, robust Key Performance Indicator, accountability, and flexible alignment to leading Scorecard methodologies such as the Balanced Scorecard. There is no automated upgrade process as part of the transition from HPS to OSSM. Sierra-Cedar provides a proven solution to fit this gap and the need to move to the more robust Scorecard application.
