

### Having SOA Stability Issues? Not Seeing ROI? You Need a SOA Health Check!

Leveraging best practices, implementing a stable and scalable architecture, and establishing solid internal policies and procedures are critical to recognizing the full benefits of an Oracle software investment. As an experienced Oracle SOA implementer and winner of several awards for innovative solutions, Sierra-Cedar has an exceptional track record of not only implementing robust Oracle SOA solutions, but also recognizing opportunities for clients to improve upon their existing implementations and methodologies. Sierra-Cedar knows how valuable Oracle software can be to an organization, but that value is often lost if the software is not implemented, used, or managed according to best practices. This Health Check includes an assessment of existing environments and recommendations to improve stability, scalability, flexibility, manageability, security, and performance.

### Summary of Services

<input checked="" type="checkbox"/> Evaluate SOA configurations and management practices	<input checked="" type="checkbox"/> Investigate specific SOA concerns or pains from Client
<input checked="" type="checkbox"/> Conduct discovery sessions with administrators and key developers	<input checked="" type="checkbox"/> Assess the security and governance policies in place
<input checked="" type="checkbox"/> Review Client documentation on architecture and usage	<input checked="" type="checkbox"/> Compare setups with standards and best practices
<input checked="" type="checkbox"/> Explore one representative integration to assess the design and development standards used	<input checked="" type="checkbox"/> Prepare a single deliverable document to capture the current state and recommendations for improvement

### Timeline and Scope

The SOA Health Check typically takes two to three weeks depending on the Client environment and the ability of the Client team to provide access and information required. Sierra-Cedar will engage consultants with SOA Architecture and WebLogic Administration skills to review the environment, complete a Health Check Scorecard, and make recommendations for improvement. While the Health Check does not include scope for executing the recommended changes, Sierra-Cedar can prepare and submit a proposal if the Client is interested in having Sierra-Cedar perform that work.

### Why Sierra-Cedar

Sierra-Cedar is an industry leader in SOA consulting with proven capability to plan, architect, and implement robust SOA solutions while also preparing your team to take ownership of the solution and continue to build upon it as needed. Our Health Checks are delivered by implementation consultants who offer valuable experience, troubleshooting ability, and industry best practices to the process and recommendations
