Oracle Hyperion 320: Hyperion Financial Reporting Development

This two-day course in Oracle Hyperion Financial Reporting takes participants through best practice exercises to create and manage reports with financial reporting data. Participants learn how to create reports based on Essbase financial cube data. In addition they will learn how to burst reports, format reports, leverage multiple report grids, and apply calculations and advanced functions for leveraging the hierarchical multidimensionality familiar in Essbase style reporting.

Oracel Hyperion 360: SmartView for Financial Users

This one-day course delivers a comprehensive hands-on walkthrough of the successor to the Oracle Hyperion Excel Add-In, Oracle SmartView. Participants will explore, develop, and manage Oracle Hyperion Essbase data sources in MS Excel, and other MS Office applications using the Oracle SmartView Microsoft Office Plug-In. Each participant, provided with their own workstation environment, will gain an understanding of how to use SmartView for day-to-day analysis routines, write back to the Essbase cube, and more.

Oracle Hyperion 430: Oracle Essbase Application Development

This two-day course in Oracle Hyperion Essbase Application Development provides participants with the wherewithal to create Essbase cube databases from scratch with a well-rounded understanding for developing outlines, loading data, creating calculation scripts, and troubleshooting common issues.
