Moving to the Cloud is a significant, transformative evolution for your organization. It's a process, not a project. As you navigate through this process, you need a partner that can help you at all stages, from strategy to execution and beyond. Sierra-Cedar is that partner.

ORACLE® Platinum Partner

Strategy

The path to the Cloud is unique for each organization. In planning your strategic move to the Cloud, numerous questions should be addressed: What business drivers are leading you to the Cloud? What are your existing systems? What's working for you? What's not? Should you step gently into the Cloud utilizing a mix of on-premise and Cloud applications (coexistence)? Or should you dive in and move everything to the Cloud? The Sierra-Cedar Strategy and Analytics team brings a wealth of knowledge and experience to help your organization in determine the best path forward.

Execution

When it comes time to implement your selected SaaS applications, Sierra-Cedar is uniquely qualified to provide solutions that are comprehensive and cost effective.

- **Product Capabilities.** Sierra-Cedar can be your one partner to implement HCM Cloud, Talent Management Cloud (including Taleo), and ERP Cloud, as well as Oracle Planning & Budgeting Cloud Service (PBCS) and Oracle Enterprise Performance Reporting Cloud Service (EPRCS).
- **Resources.** Sierra-Cedar's consultants have Oracle Cloud product-level certifications, as well as deep industry and subject matter expertise. As a decision maker, you need to make certain that you are getting a system that not only runs, but best addresses your organization's unique needs.
- **Project Approach.** Utilizing a mix of on-site and off-site resources, as well as onshore and offshore resources, Sierra-Cedar provides an implementation experience that allows for the appropriate level of direct interaction along with cost-effective task execution.
- **Integration Expertise.** Your Cloud products don't exist in a vacuum. You need your systems to communicate across the Cloud and with your on-premise systems. Our consultants can help you determine the best integration strategy and then implement it.
- **Methodology.** Sierra-Cedar employs the Oracle Unified Method (OUM) as its methodology for Cloud implementations. OUM contains a set of tools and processes designed specifically for implementing Oracle's SaaS products.

Support

One of the benefits of Cloud products is that they are designed to be consistently updated with the latest functionality and best practices. This is also a challenge, as your organization must learn how to regularly absorb these changes and make the most of them. Sierra-Cedar can help you manage this process so that your employees can stay focused on your business…not on your system.
