

Today's digital landscape has enabled organizations to innovate and drive business initiatives like never before. Organizations rely on applications in their data centers, in the Cloud, and on a multitude of devices. Perhaps the most critical piece of the puzzle is the connectivity that allows those applications, people, processes, and devices to interact with each other efficiently and securely. Sierra-Cedar's dedicated Integration & Cloud Solutions (ICS) team works closely with MuleSoft, a leader in enterprise integration and API software, to help organizations leverage the power of connectivity to address needs from basic application integration to making valuable data available as a service to customers and partners via secure APIs. Below are some of the integration services offered by Sierra-Cedar:

- Enterprise Integration and API strategies
- Cloud, On-Premise, and Hybrid integration and API enablement
- Architecture, Governance, and DevOps
- Client training and mentoring
- Health checks
- MuleSoft and DevOps tools hosting
- Remote management and support

### Your Connectivity Services Provider for Strategy, Architecture, Development, and Management

As a proven application and technology implementer and innovator for over 20 years, Sierra-Cedar combines leading integration consulting services with deep knowledge of enterprise applications both on premise and in the Cloud. We work closely with MuleSoft so our services take into account MuleSoft's future direction and established design patterns. Sierra-Cedar's ICS team focuses specifically on integration and APIs and has consultants averaging almost ten years of integration experience. We stress the importance of governance and sustainability by helping organizations understand how to create and maintain healthy processes and environments. Here are some additional facts about Sierra-Cedar:
