

Integration and API Workshops that Empower Your Team

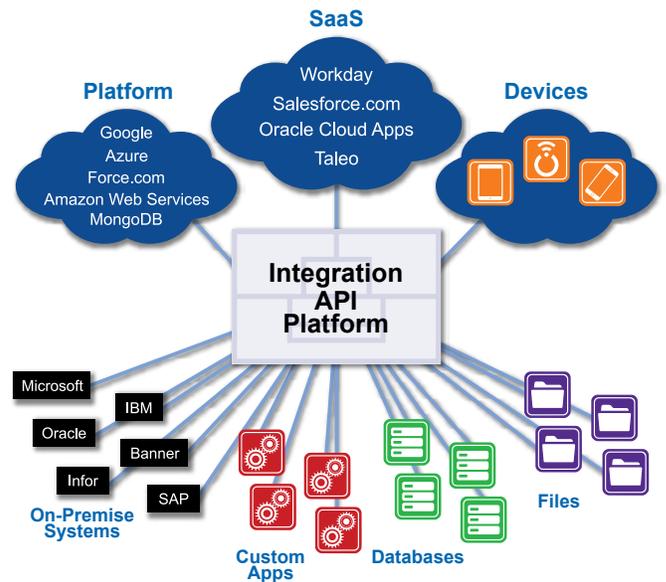

Having system integration issues? Not sure if your current integration strategy will support business goals? Planning to add or upgrade a major SaaS or on premise application and not sure how to handle the integration? Need a plan to enable Cloud and Mobile applications? Not sure where to start? We can help.

Sierra-Cedar's Integration & Cloud Solutions group specializes not only in integration and API implementation services, but also in strategy and planning services to help organizations develop plans to meet their business needs. Whether you are just starting to evaluate enterprise integration/API options or have an existing solution that is causing pains, Sierra-Cedar can help your team understand options and help devise a plan to get you on track.

Integration Strategy & Roadmap Planning

Each of our Strategy Workshops covers the following topics and incorporates our experience and integration expertise to create a personalized set of recommendations and steps to help achieve your goals:

- Business goals that drive technical decisions
- Current integration and application state
- Current and future projects and priorities
- Mobile, Cloud, BI, and public API considerations and opportunities
- Roles and responsibilities
- Governance/policies
- Proposed short-, medium-, and long-term activities
- Roadmap of projects, software decisions, integration maturity milestones, and training
- Recommended next steps

Are you getting everything you need from your integration solution?

Integration Health Checks

Sometimes it is more frustrating to have an ineffective solution in place than no solution at all. If you have an integration solution that lacks reliability, scalability, stability, flexibility, or visibility, you need a qualified assessment to help correct the problems.

- Focus IT on strategy, not maintenance
- Improve time to market
- Improve visibility
- Meet corporate SLAs
- Maximize ROI
- Make Connectivity a competitive advantage

Who Should Participate?

Based on the workshop agenda, we will recommend relevant topics for specific groups and encourage open participation. Typical attendees include:

- IT Managers
- Technical Architects
- Tech/Business Analysts
- Integration Developers

Why Sierra-Cedar?

Sierra-Cedar has been recognized as an industry leader in enterprise integration and APIs with proven capability to plan, architect, and implement robust solutions. In addition, as an implementer of on premise and Cloud applications such as Workday, Salesforce.com, Infor, Fusion Applications, PeopleSoft, and E-Business Suite, Sierra-Cedar offers a unique combination of application and integration experience and expertise to help guide your organization. Sierra-Cedar also has expertise in leading technology and platform offerings including Amazon Web Services (AWS), Splunk, Oracle Cloud, and Azure. All of these areas of expertise can be leveraged to help an organization reach its goals with applications and technology.

Workshop Offerings

Workshops can be customized to meet specific needs or focus on particular areas of priority.

1-Week Integration Strategy Workshop

- Three days of on-site interactive discovery and education sessions
- Align technical options with business goals
- Remote preparation of deliverable summarizing information gathered and recommendations
- Low fixed cost + expenses

2-Week Integration Strategy Workshop

- More in-depth exploration of current environment and system integration needs
- Observe “day in the life” of your team members
- Time & Material + expenses

4–6-Week Integration Strategy and Kick Start Workshop

- Establish strategy and goals based on interviews, team, projects, and budget
- Create initial Reference Architecture
- Side-by-side, hands-on activities to get you started
- Customer-specific scope based on priorities
- Optional pilot project or governance training
- Requires vendor software already being procured
- Time & Material + expenses

10-Day Health Check

- Identify opportunities for improving an existing environment/procedures
- Includes development, infrastructure, and development operations (DevOps) aspects
- Combination of automated checks and interviews with your team members
- Focus on pain areas
- Time & Material + expenses
- Review of one non-production environment

Next Steps

Call Sierra-Cedar to discuss goals and priorities, identify the workshop content that will be beneficial for your organization, and determine the right participants and dates for the workshop. You can be in any phase of readiness and we can tailor the content to be most relevant to you based on your situation. Let us help you make enterprise connectivity an enabler of business innovation and growth for your organization!
