

Services

Enterprise Performance Management (EPM)

- Consolidation & Close
- Planning & Forecasting
- Integrated Narrative Reporting

Sierra-Cedar helps organizations accelerate and streamline their financial close, budget, and forecast processes through best practice implementations of Oracle EPM System and EPM Cloud Solutions. We also help implement global financial consolidation solutions using Close Management and by automating currency conversions, eliminations, and SEC reporting requirements. OAC Essbase and the latest Planning and Budgeting Cloud Services are ideal multi-dimensional solutions that support write-back, forecasting, budgeting, and What-if analysis capabilities. All of these Oracle EPM solutions can be integrated with Oracle OAC BI and data visualization reports and dashboards to provide end users with reporting access to both their EPM solutions and enterprise BI reporting needs across the business.

Oracle Analytics Cloud (OAC)

- Data Visualization
- Dashboard Analytics
- Essbase Management Reporting
- Machine Learning/Predictive Analytics

OAC is Oracle's strategic cloud analytics offering that integrates the power of multi-dimensional Essbase capabilities with the flexibility of Oracle BI dashboard analytics. This provides a cloud platform that can scale and support your analytic needs across the enterprise. OAC also provides Data Visualization for end-user driven, self-service visual analysis, as well as robust machine learning predictive analytics. OAC also includes a leading mobile analytics capability that enables Users to talk to their mobile phones to retrieve up-to-date reporting.

Enterprise Resource Planning (ERP)

- Integration
- Implementation
- Managed Services

Sierra-Cedar has a primary focus on Oracle BI solutions and Cloud services, with deep knowledge on the analytical reporting needs of both PeopleSoft and Oracle EBS ERP solutions. Our industry-specific experience combined with our deep knowledge of ERP applications and deep expertise on BI-enabling tools and technologies uniquely positions us to help make critical connections between our customer's business needs, systems, and information needs. Our proprietary Propel Methodology is delivered by seasoned consulting specialists using leading practices, innovative in-house tools, and a wealth of templates, boilerplate documents, and utilities that drive effective development in a transparent and open fashion.

Data Warehouse/Data Lake (DATA)

- Integration
- Warehouse/Lake
- Performance Tuning
- End-to-End Solution Architecture

Our team has been focused on designing and developing data warehouse and business intelligence solutions for over a decade. We partner closely with Oracle development and stay on top of the latest solution offerings to optimize our client implementations. We help clients from the visionary roadmap phase, through enterprise implementation and training.
