

MuleSoft allows an organization to achieve API-Led Connectivity between services and applications running on Cloud platforms, on premise, or anywhere on the Internet with the convenience, flexibility, and scalability of the Cloud. As a MuleSoft Partner, Sierra-Cedar provides management and support services that complement MuleSoft solutions to help organizations reduce costs and improve efficiency with strong DevOps. Sierra-Cedar offers the following MuleSoft services:

- Architecture (environment, governance)
- DevOps (software, processes, automation)
- Design/Development (standards, services)
- Prod Support (environment, applications)

**Why Manage It All Yourself?**

**Sierra-Cedar Can Help with Your Cloud-Based Initiatives**

We use popular DevOps tools (Jenkins, Maven, Git, etc.) or connect AWS DevOps services to your MuleSoft Cloud environment. Monitoring can be included using tools such as Splunk or Elk/Elastic Stack, also in the Cloud.

We offer Admin and Production support of MuleSoft environments and deployed applications via onshore and offshore Managed Services teams. This includes Runtime, Anypoint MQ, API Management, and Analytics.

We can help implement and manage other Cloud services and applications:

- Databases
- Messaging
- Auditing
- Backups
- Archiving
- Custom Apps
- Monitoring
- Automation
