

Is the hassle of manual testing restricting your PeopleSoft environment?

Reduce the time spent on mundane testing activities by at least 50%, while increasing accuracy and cutting costs, using Sierra-Cedar's Automation Solution with PTF.

Testing Challenges

With ongoing PUM updates and tax/regulatory updates on PeopleSoft 9.2, testing is a repetitive and time-consuming activity requiring valuable time from your IT/business teams.

Business Impact

Due to the inability to validate the environment, businesses are unable to implement new features/functions or upgrade/update their PeopleSoft applications.

Our Automation Solution

Sierra-Cedar's PTF Automation Solution allow customers to automate testing while freeing business users up to focus on results and troubleshooting/remediating issues.

About Sierra-Cedar

Sierra-Cedar is the leader in delivering PeopleSoft services and solutions. The combination of highly-skilled consultants, innovative solutions, and comprehensive set of Consulting and Managed Services can be tailored to fit your project scope. We have successfully delivered thousands of projects across Implementation, Upgrade, Extend/Add-on applications, Application Management Services, and Hosting/Cloud offerings.

Major Components: PTF Automation Solution

Sierra-Cedar's PTF Automation Solution addresses diverse client needs, with a library of reusable scripts available for all key modules and a dashboard to summarize test results.

Pre-Built Test Cases

Sierra-Cedar has pre-built and recorded automated test cases for commonly used PeopleSoft pillars, such as Campus Solutions, Human Capital Management, and Financial Management. These pre-built test cases enable the testing of all PeopleSoft functionality faster than ever before.

PTF Workbench

Sierra-Cedar has built a PTF workbench that acts as a one-stop solution for analyzing results and executing scripts. It allows users to bundle automated test scripts into logical test plans and scenarios that suit the various testing needs that clients may have.

Our Proficiency

Sierra-Cedar boasts deep product experience with PeopleSoft, and provides resources with varied industry and business process related experience in HCM, Financials, and Campus Solutions. Our Functional and Technical Consultants, along with our PeopleSoft Administrators bring solid skillsets and experience with many clients on implementations, application upgrades, PUM upgrades, and managed services projects.

The Benefits of Sierra-Cedar's Automation Solution with PTF

Faster Test Cycles

Improved Accuracy

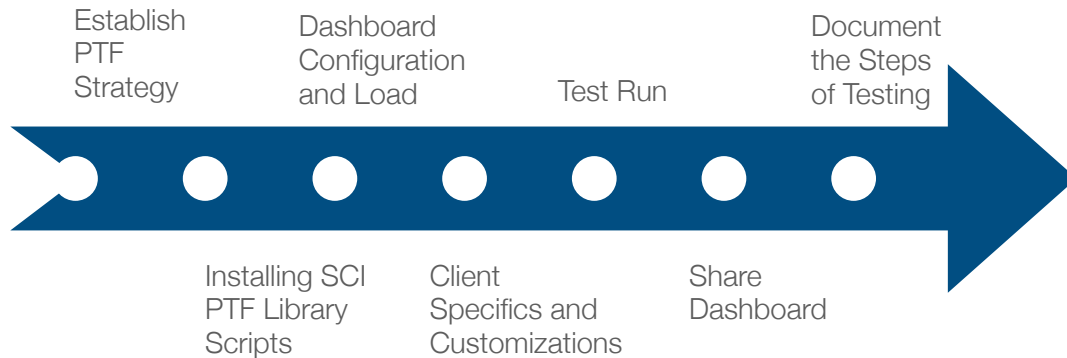

Easier Regression Testing

Intuitive Reports & Analytics

Methodology for Delivering PTF Automation Solution

Sierra-Cedar's methodology has the flexibility to be configured for any of the key modules and regardless of the level of customizations in the environment.

Our Offerings

Since organizations are at different stages with the adoption of PTF, Sierra-Cedar has tailored service offerings that may suit every client's need.
